# WELCOME

Romance Tourism is very significant for Mexican destinations, because of the positive impact it has on the local economy, integrating the entire network of resources that makes this industry possible. Currently, Romance Tourism is an efficient industry to accelerate the economical growth of many communities in our country, help modernize the infrastructure, boost the economy, promote our cultural resources, balance the social equality and support sustainability.

This segment covers not only destination weddings, but also proposals, bachelor and bachelorette parties, honeymoons, wedding anniversaries, vows renewals, last trip before the baby's birth (Babymoon), second nuptials, travel with the family (Family-Moon) and a new niche that is growing exponentially with the current epidemiological and economic conditions, which are elopement weddings.

In Mexico, year after year the network of resources throughout our destinations are specializing in this segment, holding a significant number of destination weddings annually. While the favorite setting for couples has been our beautiful beaches, the new generations are being attracted to colonial and adventure destinations.

Therefore, the Mexican Tourism Board - SECTUR, through the General Directorate of Innovation for Tourism, is promoting Romance Tourism, focusing not only on destination weddings, but also seeking the integration of other tourism products and experiences in and around that special moment, allowing the incorporation of the local population, which contributes to raising their quality of life.

This catalog is the result of a coordinated effort between the Destination Wedding Specialist Association - DWSA, the Secretariat of Tourism of Guanajuato, all the specialized suppliers of this tourist destination and the Mexican Tourism Board. Together we carried out virtual workshops to create innovative tourism services aimed to the Romance Tourism, with an individual value that gives them a distinctive character and, at the same time, a unique identity.

In this way, local vendors and communities represented by artisans, traditional cooks, agribusinesses and cooperatives have been incorporated, thus seeking social development with a gender and inclusion perspective.

It is important to mention that this work responds to the new tourist policy that seeks to encourage the benefits of this activity to showcase the localities, and reach more sectors of the population, seeking a balanced development of the country's regions.

We hope that this document is not only useful but interesting, and that it contributes to your experience of living and enjoying Mexico.

After the independence, this noble activity was lost and 200 years later, it returned from the hand of a new generation of wine-growing houses, filling the landscapes of the state with grape vines.

The five routes can be followed according to the town one is in, offering the opportunity to get to know the Guanajuato terroir, walk through the vineyards and learn about the processes that transform grapes into wine and taste different labels.

# THE MAGIC OF POZOS

# MINERAL DE POZOS

There is a place in Guanajuato where nothing will break your tranquility while you let yourself be carried away by the history that its walls and vestiges have to tell you. Many call this place a Ghost Town, but we are sure that as you pass through the Pueblo Magico of Mineral de Pozos you will find more life than you ever imagined.

With a calm and bohemian air framed by the semi-desert environment, Mineral de Pozos was not always abandoned, since at first various nomadic indigenous groups such as the Chichimecas, Huachichiles, Copuces, Guaxabanes and Pames found in these lands the perfect place to set up their camps. Little did they know that at their feet, there were streaks of gold and silver.

# MINERAL DE POZOS

By the eighteenth century in the colonial era's boom, the town that originally focused on agricultural activities was founded. However, with the discovery of the Santa Brígida mine, the fate of the town was sealed for mining activities. Its population were dedicated to the search for gold, silver, copper and zinc during the Porfiriato, until its residents abandoned it in 1920.

Now, which is only the echo of those mining times, the town has come to life in another way. Travelers come to it to enjoy the solitude that prevails in the environment but above all to walk through its cobbled streets, the vestiges of the haciendas and mining sites. In the afternoons they visit antique and handicraft stores to buy some quartz or semi-precious stones from the local mines. Reminiscence of the past that this magical town reveals.

It is possible to get to Mineral de Pozos from the cities of San Juan del Rio in Queretaro, Guanajuato and San Luis Potosi. The best season to visit this destination is from February to December, as you will enjoy a warm semi-desert climate.
